The Licensing Exam Review Guide in Nursing Home Administration
James E. Allen, PhD, MSPH, NHA, IP, is an associate professor of Health Policy and Administration Emeritus at the University of North Carolina at Chapel Hill and president of LongTermCareEducation.com, a national resource website for information on the long-term care field. He has 30-plus years of experience in teaching and conducting research in the field of health care administration. He taught courses at the University of North Carolina at Chapel Hill in long-term care administration, medical ethics, and the organization and financing of health care delivery in the United States. He has provided legal consultation in long-term care litigation matters across 10 states.

The website www.longtermcareedu.com (or www.ltce.com) provides more than 500 pages of state-by-state, up-to-date information on such subjects as:

- Becoming a nursing home administrator
- Becoming an assisted living administrator
- Exploring a career in long-term care
- Contacting the state licensing authority in each state
- Enrolling in college programs in each state
- Obtaining key publications in the long-term care field
- Getting continuing education units.

Dr. Allen can be reached via e-mail through the website, or directly at jeallen@mindspring.com or jamesallen@unc.edu, or via phone (1-929-815-0387) or fax (1-919-953-6825). Continuing education units for both nursing home and assisted living administrators are also available through the website (www.LongTermCareEducation.com).

Additional resources from Springer Publishing Company are available to persons preparing to become long-term care administrators:

Nursing Home Administration, Seventh Edition: The definitive textbook of essential knowledge for obtaining licensure and employment as a nursing home administrator.

Introduction: Uses of This Study Guide for the NAB Domains of Practice ix
Format of the National Exam xi
The “One-Best-Answer” Testing Format xiii
Deciding What the Question Is xv
Deciding What the Answer Is xvii
Strategies for Test Taking xix

PART 1: NAB DOMAIN: MANAGEMENT, GOVERNANCE, AND LEADERSHIP*

Learning How to Manage the Health Care Organization 1

1.1 Management Functions 6
  1.1.1 Levels of Management 9
  1.1.2 Line–Staff Relationships 10
1.2 Forecasting 11
1.3 Planning 13
  1.3.1 Why Plan? 13
  1.3.2 Steps in Planning 14
1.4 Organizing 16
1.5 Staffing 20
1.6 Directing 20
  1.6.1 Policy Making 21
  1.6.2 Making a Decision 22
  1.6.3 Leading 22
  1.6.4 Power and Authority 26
  1.6.5 Communication Skills 28
  1.6.6 Organizational Norms and Values: Code of Ethics and Standards of Practice 31
  1.6.7 Related Concepts 33
1.7 Comparing and Controlling Quality 36
  1.7.2 Diagnosing/Organizational Quality 37
1.8 Innovating 40

*Numbering of headings in this Review Guide corresponds to key headings in Nursing Home Administration, Seventh Edition.
1.9 Marketing the Long-Term Care Facility 42
  1.9.1 The Turn to Marketing 42
  1.9.2 The “Marketing” of Health Care 43
  1.9.3 Developing a Marketing Strategy 44

PART 2: NAB DOMAIN: HUMAN RESOURCES

Understanding the Departments and Managing Human Resources 47
  2.1 Organization of the Nursing Facility and Its Staff:
      Emergence of the “MDS” Coordinator 47
  2.2 Identifying the Human Resources Functions 53
  2.3 Planning Employment Needs: Writing Job Descriptions 54
  2.6 Hiring Staff 55
  2.7 Training Staff 59
  2.8 Retaining Employees 61
  2.9 Evaluating Employees 66
  2.10 Paying Employees 68
  2.11 Disciplining Employees 68

PART 3: NAB DOMAIN: FINANCE/BUSINESS

Learning to Manage the Organization’s Finances 71
  3.10.1 Sources of Law 88
  3.10.2 The Court Systems 88
  3.10.3 Legal Terminology 88
  3.10.4 Risks Assumed by the Operation of a Long-Term Care Facility 92

PART 4: NAB DOMAIN: ENVIRONMENT

Learning the Continuum of Long-Term Care 95
  4.1 Origins, Overview, and Current Profile of the Nursing Home Industry 95
  4.2 The Social Security Act: Medicare and Medicaid 96
  4.5 Workplace Safety: The Occupational Safety and Health Act 97
  4.6 Fire Safety: The Life Safety Code® 97
  4.7 Americans With Disabilities Act (ADA) Accessibility
      Guidelines for Facilities 102
  4.8 Expanding Facility Services: Health Planning Regulations 106
  4.9 Voluntary Operating Standards: The Joint Commission on
      Accreditation of Health Care Organizations 107

PART 5: NAB DOMAIN: PATIENT/RESIDENT CARE

Building Your Resident Care Skills 109
  5.1 The Aging Process: Overview and Theories 109
  5.2 Medical and Related Terms 110
      5.2.1 Specializations 110
      5.2.2 Medications/Therapeutic Actions of Drugs 112
      5.2.3 Abbreviations 115
5.2.4 Prefixes 119
5.2.5 Suffixes 125
5.3 The Aging Process as It Relates to Diseases Common to the Nursing Home Population 129

PART 6: FACILITY POLICIES

Putting the Systems Together 139

6.1 Setting Policies for the Facility 139
6.1.1 Administration Policies 139
Resource Utilization 140
Mental Illness 141
Compliance With Laws 141
Governing Body 142
Transfer Agreement 142
Changes in Ownership 143
6.1.2 Personnel Policies 143
Properly Qualified Activities Program Professional 143
Social Services 143
Registered Nurse 144
Consultant Pharmacist 144
Training of Nurse’s Aides 144
Regular In-Service Education 145
Use of Outside Resources 145
Disaster and Emergency Preparedness 145
Not Employing Certain Individuals 145
6.1.3 Dietary 146
6.1.4 Admissions Policies 146
6.1.6 Rehabilitation Policies 146
6.1.7 Resident’s Rights 147
Incompetence/Competence 147
Resident’s Exercise of Rights Without Reprisal 148
Resident’s Rights to All Records 148
Resident’s Rights to Full Total Health Status Information 149
Resident’s Rights to Advance Directives and to Refuse Treatment and/or Research 149
Work 150
Protection of Resident’s Funds 150
Allowable Charges 151
Work 152
Mail Rights in Sending and Receiving 152
Access and Visitation Rights 153
Furniture 153
Married Couples Sharing a Room 153
Self-Administration of Drugs (Requirements) 153
Resident Transfers 153
Family Meetings 154
Private Pay 154
Payments 155
Freedom From Restraints 155
Abuse 155
Restraints 155

6.1.8 Quality Assessment and Assurance: Meeting the Holistic Needs of the Care Recipients 156
Roommate and Room Changes 157
Quality Assessment and Assurance 157

6.1.9 Dietary 158
Substitutes 158

6.1.10 Environmental Management 159
Preventive Maintenance 159

6.1.11 Infection Control 160

6.1.12 Physician Services 161
Plan D 163
Nurse’s Aide Training 163

6.1.13 Dental Care 164

6.1.14 Nursing Requirements 165
Standards of Quality 165

6.1.15 Quality of Care Using the Resident Assessment Instrument to Ensure Care Recipient Satisfaction 165

6.1.16 Pharmacy 166

6.1.17 Medical Records 167

6.2 Developing a Person-Centered Care Plan 167
Resident Assessment Instrument 167

6.3 The Quality Indicators Survey 167

6.4 The Report Card 169

6.5 Getting Reimbursed for Care Given 169
The Prospective Payment System 169
The Minimum Data Set (MDS) 169
The Resource Utilization Group (RUG) Classification System 170
Activities of Daily Living (ADLs) 170
Reimbursement 171

Answers and Rationale for Questions 1 to 31 175

Answer Key 179
Introduction: Uses of This Study Guide for the NAB Domains of Practice

The review questions in this guide are intended for use by persons who are studying for the national licensure examination.

Sample study questions are provided from several texts and sources in the long-term care field, including more than 70 questions on the Final Rules for Medicare and Medicaid Requirements for Long-Term Care Facilities: Federal Appendix PP and Nurse’s Aide Training and Competency Evaluation Programs.

National examination questions are picked by computer from a bank of more than 2,000 items. On average, more than 3,000 persons take this examination each year. Generally, about three unique exams are offered each year. The National Association of Boards of Examiners for Long-Term Care Administrators (NAB) exam is taken on a computer and each time the exam is taken, the applicant will have a different set of questions unique to that exam.
Format of the National Exam

The national examination is set up in the multiple-choice, one-best-answer style of question to test the level of each candidate’s knowledge.

This review guide is designed to acquaint the user with relevant terms and provide practice in the multiple-choice, one-best-answer examination format.

Two basic benefits are received: (a) feedback on comprehension of the terms and concepts in areas similar to those covered in the national examination, and (b) experience with the multiple-choice testing format used in the national exam.

Use of this review guide without the text book, *Nursing Home Administration*, Seventh Edition, and other similar sources achieves only initial knowledge about the field of nursing home administration. The bits and pieces of information obtained from these study questions are not a substitute for systematically studying the basic principles and information contained in the reading materials for Long Term Care Education (LTCE) 201 and 202 (www.LongTermCareEducation.com) and other equivalent resources.
The “One-Best-Answer” Testing Format

There is always one best answer to each of the questions in this book and on the exam. In the following question, only one answer can be correct.

The Lifespan Respite Care Act, allowing for the first time public payment to relatives to give care to family members, was passed in _____.
1. 1995
2. 2006
3. 2007
4. 2008

Because the Lifespan Respite Care Act was passed in 2006 (answer 2) all of the other answers are completely wrong. In the following question, however, options 1, 2, and 4 are all partially correct, but 3 is the correct answer because it is the most complete (best) answer.

In the nursing facility a resident may perform services for the facility if the services are _____.
1. Voluntary
2. Paid at or above prevailing rates
3. In the plan of care
4. Light duty in nature

All four options are partially correct; services performed must be voluntarily assumed, paid for at or above prevailing wage rates, and light duty in nature. However, even if services performed by a resident meet the three requirements in options 1, 2, and 4, they are prohibited if not in the resident’s plan of care. Hence, 3 is the one best answer.

Following is an additional example.

Control is the evaluation by the organization decision makers of _____.
1. Capital assets
2. The outputs of the organization
3. Deficit spending
4. Employee goals

The correct answer is 2, the outputs of the organization. Each of the other options is potentially correct. Organization decision makers do evaluate or make managerial judgments about capital assets, deficit spending if it occurs, and employee goals.
However, the keyword in the question is *control*. The correct answer is the answer that best defines control behavior by organizational decision makers. Answer 2 more fully defines control than any of the other three.

Sometimes the respondent is asked to mark the answer that is the least correct. For example,

The National Labor Relations Board does not _____.
1. Determine what the bargaining units shall be
2. Conduct representation elections by secret ballot
3. Investigate unfair labor practices
4. Make court decisions

The answer is 4. Answers 1, 2, and 3 are all activities the National Labor Relations Board *does do*.
Deciding What the Question Is

A key to successfully answering multiple-choice questions is correctly deciding what is being asked. For example:

In states that still require government permission to build new nursing homes, if the health authority believes a shortage of beds exists, it may ____.
1. Require that additional beds be built
2. Let a contract for building new beds
3. Advertise for bids
4. Issue a permit to build (Certificate of Need)

The issue being tested here is: Does the respondent know the functions and typical scope of powers exercised by a public health planning authority? The respondent needs to know that powers of health planning authorities are limited to granting permission for the applicant to build new beds.

To answer the question correctly, the respondent needs to further understand that local and state health planning authorities normally have no power to require that additional beds be built, to let contracts for building new beds, or to advertise for or let bids for constructing facilities with new beds. These are activities performed by the owners of the new facilities.
Deciding What the Answer Is

Once the respondent has accurately decided the question about which he or she is being tested, the one best answer to the question must be selected. If the respondent knows what the answer ought to be, a useful technique is to look immediately for the correct answer. For example,

For nursing facilities, meeting accreditation requirements set by the JCAHO (Joint Commission on Accreditation for Healthcare Organizations) is _____.
1. Voluntary
2. Mandatory
3. Required to receive Medicaid payments
4. Required to receive Medicare payments

If the reader knows that meeting requirements set by JCAHO are entirely voluntary for nursing facilities, he or she should look immediately for the correct answer, which in this case is 1. The other options can then be read to ensure that there is not a better or more correct or complete option to mark as the correct answer.

To answer this question correctly, the reader needs specific information; for example, knowledge of Medicare and Medicaid requirements for nursing facilities and the federal requirements that must be met for reimbursement for Medicare or Medicaid patient charges. If read hastily, this question could be deceptive because hospital accreditation by JCAHO is required for hospital eligibility for reimbursement of Medicare patient charges. The equivalent for nursing homes is to meet the federal requirements set by the federal and state governments.

Thus, several areas of understanding may be tested simultaneously by a single question such as the one in the example.
Strategies for Test Taking

Test taking, like driving a car, is an acquired skill. It is a complex task that, once learned, can become second nature when the techniques are established. In addition, practice in answering the types of questions that may be asked can ease the tension level when in the actual test situation. Following are some strategies for taking computer-based multiple-choice tests.

In an examination consisting of 150 questions, each with four possible answers, the reader must cycle through 600 possible answers. Giving equal energy to each of the 600 possible options can lead to mental fatigue early in the examination and may result in unintentional errors. Several techniques are available to help reduce mental fatigue.

MARKING QUESTIONS FOR LATER REVIEW

The test will contain questions that the reader can answer with confidence, but there will inevitably be questions where the answer is only a guess.

To save time and energy, it is advisable to proceed through the entire exam at a steady pace, marking for later review questions about which the reader is unsure. Do not try to puzzle out each doubtful or unknown question in the order in which it appears. Go on to the next. This ensures reasonably quick progress through the exam. Using this strategy, it will be found that a large proportion of questions will have been correctly answered during the first run through. A second attempt to complete the remaining items will often reveal the answers at this stage.

MAKING FINAL CHOICES

Once all items have been marked, it is time for a second run through for a final decision about the choices made.

Experience has shown that the first answer chosen is often the best one. However, if the respondent is sure, on restudying the question, that a different response is the correct one, the answer originally marked should be changed.

USING THE TIME AVAILABLE

The goal is to achieve the best possible score on the examination. For most people this should mean taking advantage of all of the time available. Rereading the questions and assuring oneself that the correct answer has been chosen is usually time
well spent. In multiple-choice questions, there is often one keyword or phrase that may elude the reader on the first reading, but might change the answer dramatically.

**FINAL REVIEW**

If there is time, the respondent should assure himself or herself that the question being asked in every item has been correctly understood and the correct answer marked.
NAB Domain: Management, Governance, and Leadership

Learning How to Manage the Health Care Organization

Questions 1 to 31 portray often-encountered situations in the nursing home profession. The answers and rationale to Questions 1 to 31 can be found in the section of this book preceding the Answer Key.

Question 32 to the end flow sequentially through the topics in Nursing Home Administration, Seventh Edition, by James E. Allen, PhD, MSPH, NHA, IP. Answers can be found in the textbook on the page numbers in parentheses following each of these questions. In Part 6, answers can be found in Nursing Home Administration, Seventh Edition, and Nursing Home Federal Requirements: Guidelines to Surveyors and Survey Protocols, Eighth Edition, by James E. Allen, MSPH, PhD, NHA, IP (both published by Springer Publishing Company). Those found in Nursing Home Federal Requirements are distinguished by the reference “(See Federal Requirements).”

1. The most likely single cause for the series of bankruptcies among larger nursing home chains around the year 2000 was ____.  
   1. Too small increases in government reimbursement rates  
   2. Paying too much for acquisitions in 1998 and 1999  
   3. Not taking advantage of falling interest rates  
   4. Thinking too small

2. In a chance conversation with the owner of an eight-facility chain, the newly hired administrator for the oldest facility in the chain indicates that, because the mortgage is fully retired, the administrator will concentrate more on being effective than efficient since the Quality Indicators are all at or above the state’s average. The owner would likely ____.  
   1. Be pleased  
   2. Be distressed  
   3. Be content  
   4. Praise the newly hired administrator
3. Occupancy of Facility A has been a steady 70% since the Prospective Payment System was introduced. Two weeks ago, a new 120-bed, equally equipped facility opened several blocks away. The Facility A administrator tells the admissions counselor to continue the usual recruitment approach. The chain owners ought to _____.
   1. Rest comfortably
   2. Seek a new administrator
   3. Appoint a new admissions counselor
   4. Take no action

4. Bankruptcies among larger nursing home chains prior to 2000 _____.
   1. Were frequent
   2. Were ubiquitous
   3. Were highly unusual
   4. Were routinely declared to avoid too much accumulated debt

5. Under the Prospective Payment System, nursing facilities’ reimbursed costs _____.
   1. Were about the same as previously
   2. Were more bundled
   3. Used an unbundled cost structure
   4. Were reimbursement for actual costs

6. In recent years, Medicare has _____.
   1. Allowed facilities to make a modest profit
   2. Shifted more costs onto nursing facilities
   3. Eased up on economic pressures previously placed on facilities
   4. Remained relatively unchanged in its reimbursement structure

7. The nurse newly promoted to director of nursing insists on giving four RN hours of patient care each day on the Alzheimer’s wing in the 175-bed facility. The administrator should _____.
   1. Praise the new director of nursing for her resident centeredness
   2. Appoint an assistant director of nursing
   3. Adapt the job description to fit her pattern
   4. Seek a new director of nursing

8. The applicant for the administrator position in a facility near a large teaching hospital insists that, as before in his rural facility, if hired he would not let the Medicare reimbursement policies affect his case mix. This applicant _____.
   1. Should be hired
   2. Is likely to succeed if hired
   3. Can likely succeed in his goal
   4. Is out of touch
9. The newly hired assistant to the administrator insists that the organizational chart dotted line between this position and the Department of Nursing be a solid line. The administrator should _____.
   1. Agree in general
   2. Agree to this special case
   3. Ask the director of nursing for his or her opinion
   4. Be forewarned

10. The medical supplies provider tells the administrator of a facility that has not paid bills for the past 3 months but is now operating under a bankruptcy judge’s approved plan for restructuring, that no more deliveries will be made until past bills are fully paid. The medical supplies provider _____.
    1. Is smart to cut losses at that point
    2. Does not understand how bankruptcy works
    3. Will now likely get his past due bills paid
    4. Is farsighted

11. An administrator who adopts the leadership-by-walking-around (LBWA) approach by walking through the facility weekly and intently observing has _____.
    1. Become an effective leader
    2. Chosen a good management style
    3. Failed to understand LBWA
    4. Implemented a useful strategy

12. The nursing facility administrator who, using the leadership-by-walking-around (LBWA) technique, succeeds in actually making appropriate corrections on the spot during her rounds _____.
    1. Is effectively implementing the concept
    2. Gains additional power through the process
    3. Exhibits appropriate leadership
    4. Does not understand LBWA

13. The rate of increase in the total number of nursing facilities in the United States during the years 2008 to 2012 is _____.
    1. Likely to be about level
    2. Likely to double
    3. Likely to triple to accommodate the baby boomer generation
    4. Likely to decrease markedly

14. The applicant for administrator of the facility insists that he has successfully used democratic leadership to the exclusion of all other leadership styles. The interviewer should _____.
    1. Recommend hiring this candidate
    2. Praise the candidate
    3. Be favorably impressed
    4. Continue to interview candidates
15. The candidate for administrator said that she used a variety of administrative styles, but could not say exactly which she would use in every circumstance. The interviewer should be _____.
   1. Favorably impressed
   2. Unfavorably impressed
   3. Concerned about possible indecisiveness
   4. Looking for one leadership style

16. The candidate for administrator indicated that he consistently chose the charismatic style of leadership. This should ____ the interviewer.
   1. Reassure
   2. Alert
   3. Confirm the candidate’s qualifications to
   4. Please

17. The costs of providing subacute care to nursing home residents _____.
   1. Is perhaps triple that of the more typical patient
   2. Covered by Medicare
   3. Absorbed by Medicaid if Medicare coverage is inadequate
   4. Mostly covered by private insurance

18. The nurse supervisor who had just been appointed director of nursing announced at the first department head meeting that she had circulated a memo among the nurses that only formal communications were to be allowed in the nursing department. The administrator should _____.
   1. Be relieved
   2. Confirm the decision
   3. Be supportive
   4. Anticipate problems

19. The department head was not surprised to learn that an employee had heard only the positive comments to the employee and ignored the criticisms. The department head’s grasp of the communication process is _____.
   1. Deficient
   2. Appropriate
   3. Out of focus
   4. Inadequate

20. The administrator routinely accepted as a nearly exclusive information source the director of nursing’s positive reports that nursing was going well. The administrator is _____.
   1. Showing appropriate confidence in the director of nursing
   2. Utilizing the director of nursing properly
   3. Realizing a successful appointment has been made
   4. Placing himself at risk
21. Periodic shortage of nurses available for nursing home employment _____.
   1. Is being solved by community college programs
   2. Is decreasing
   3. Can be readily solved by hiring temporary nurses
   4. Is likely to remain for the foreseeable future

22. Congress and the federal rule makers behave as if the facility will run success-fully if Congress and the Centers for Medicare and Medicaid Services can write enough rules. They are _____.
   1. Incorrect
   2. Correct, according to behavior theory
   3. Pessimistic about the need for rules
   4. Correct, according to emerging management theory

23. When the administrator notices that the director of nursing seeks to turn as many duties as possible over to housekeeping, the administrator should con-clude that the director of nursing is _____.
   1. Behaving normally
   2. Holding a grudge against housekeeping
   3. Unwilling to be cooperative
   4. Wielding power desirably

24. The administrator insists that a timely copy of all reports generated within the facility come across her desk before anyone signs them. The administrator is _____.
   1. Not rationalizing her management information system
   2. Making appropriate and desirable requests
   3. Exercising good judgment
   4. Initiating an appropriate management information system

25. The administrator notices that incident reports are being insufficiently filled out, but does nothing, believing that the situation will likely correct itself. The administrator is _____.
   1. Practicing effective control
   2. Likely to be correct
   3. Failing to control effectively
   4. Right to monitor the situation for a period of time

26. Corporate sends a directive to its flagship facility administrator directing the administrator’s attention more toward the outcome of resident care than the cost of resident care during the coming 12 months. Corporate is more concerned with _____. than with _____.
   1. Effectiveness; efficiency
   2. Efficiency; effectiveness
   3. Expenses/inputs
   4. Expenses/throughput
27. The long-term care sector receiving increased funding and attention from the federal government is the _____.
   1. Home health care sector
   2. Volunteer hospice group association
   3. Long-term care hospital sector
   4. Private insurance industry

28. The concept that nursing homes should be reimbursed by states for their actual costs was part of the _____.
   1. Emerging Medicare approach
   2. Federal administration’s goal as seen in new budgetary appropriations
   3. Hatch Amendment
   4. Goal statements of most state governments

29. The intense health care cost-shifting efforts among providers such as Medicare, Medicaid, and local governments are _____.
   1. On the wane
   2. Likely to continue
   3. Leading to increased reimbursements
   4. Good for the nursing home profession

30. Worried about the level of actual resident care being achieved in the facility, the administrator directs the nurses to spend less time charting and more time focusing on the effectiveness of care being given to residents. The likely result will be _____.
   1. Better resident care, possibly increased deficiency citations
   2. Better resident care, decreased deficiency citations
   3. No real improvement in resident care, decreased charting
   4. Greater sensitivity to residents’ needs and better documentation

31. The new social worker informs the head of nursing that admissions is all she has time for and that nursing must monitor and document each resident’s sociopsychological experiences. The new social worker is _____.
   1. Responding appropriately to priorities
   2. Achieving a better balance of assignments within the facility
   3. Responding inappropriately
   4. Likely to improve the case mix dramatically

1.1 MANAGEMENT FUNCTIONS*

32. Today the twin forces of _______ and _______ are revolutionizing the delivery of health care. (p. 2)
   1. Technology/patient rights
   2. Obamacare/patient data legislation
   3. Technology/patient data legislation
   4. New inventions/rapid adoption of inventions

*Answers can be found in Nursing Home Administration, Seventh Edition, on the page numbers in parentheses following each question.
33. Most of the multiple new devices to monitor and diagnose each individual’s health status are creating new monitoring and diagnostic capacities _________. (p. 2)
   1. Outside the hospital
   2. Outside the doctor’s office
   3. Outside the hospital and doctors office
   4. Primarily within the hospital setting

34. For the nursing facility setting, the new capacities to monitor residents’ health offer dramatic new opportunities to improve _________. (p. 2)
   1. Diabetes treatment
   2. Pneumonia management
   3. Infection control techniques
   4. Chronic disease management

35. Patient data legislation, such as the most recent health care legislation, has set into motion a nationwide policy to promote patients’ access to their _________. (p. 2)
   1. Rights
   2. Personal data
   3. Medical records
   4. Family history

36. Under the Affordable Care Act, the residents can access their own lab test results within 30 days of request ________. (p. 118)
   1. With their physician’s permission
   2. With nursing personnel’s permission
   3. If from a government lab
   4. Without going through the physician who ordered the test

37. The concept of lab-on-a-chip will ________. (p. 118)
   1. Speed up lab diagnoses in the nursing facility
   2. Eliminate the need for diagnoses
   3. Increase the cost of diagnoses
   4. Be done by the residents

38. Attempting to find the right person for each well-defined job is known as the management function of _____. (p. 3)
   1. Personnel work
   2. Interviewing
   3. Staffing
   4. The job search

39. The administrator who takes steps that ensure that the goals are accomplished and that each job is done as planned is successfully ________. (p. 5)
   1. Getting results
   2. Improving outputs
   3. Controlling quality
   4. Sensing organizational needs
40. The administrator’s job is to ensure that the _____ employees do the tasks of the organization at an acceptable quality level. (p. 4)
   1. Best prepared
   2. Trained
   3. Appropriate
   4. Unmotivated

41. The administrator who conducts a national search for a director of nursing position and interviews 20 candidates from seven different surrounding states by phone is engaged in the managerial function of _____. (p. 5)
   1. Directing personnel development
   2. Staffing
   3. Broad personnel searches
   4. In-depth interviewing

42. In the end, it can be said that the administrator’s responsibility to meet resident care needs and facility financial needs are _____. (p. 6)
   1. Clearly unequal
   2. A mismatch
   3. Both about equal
   4. Unclear

43. Superior performance depends on taking exceptional care of residents via superior service and _____. (p. 6)
   1. Constant attention to the bottom line
   2. Constant innovation
   3. Attention to detail
   4. A good attitude

44. Superior performance for a nursing facility comes through _____. (p. 6)
   1. Having all the beds full
   2. Achieving consistent profitability
   3. Innovation in ways to serve residents
   4. Efficient management of the budget

45. The superb nursing facility is superb by virtue of its _____. (p. 6)
   1. Success in attention to consistent profitability
   2. Success in serving the residents
   3. Reputation in the community as a friendly place
   4. Achieving superior ratings

46. Answering the phones and resident call bells with common courtesy and doing things that work are examples of _____. (p. 6)
   1. Good sense
   2. Uncommon perceptions
   3. An ability to be practical
   4. A blinding flash of the obvious
47. Giving every employee the space to innovate at least a little; listening to residents and acting on their ideas; and wandering around with residents, staff, and suppliers are examples of the difficult-to-achieve _____. (p. 6)
   1. Long-range goals
   2. Short-range goals
   3. Commonsense, obvious
   4. Typical facility approach

1.1.1 LEVELS OF MANAGEMENT

48. In a facility of 120 beds, the administrator _____ personally perform each of the management tasks. (p. 7)
   1. Need not
   2. Should
   3. Over a month will
   4. Over a year will

49. To ensure that all the management tasks are successfully accomplished, the administrator of a 120-bed facility will typically divide management into ____. (p. 7)
   1. Two layers
   2. Three layers
   3. Eight cooperating teams
   4. Four teams

50. A licensed person responsible for formulating and enforcing policies that will be applied to an entire facility is thought of as a/an _____. (p. 7)
   1. Upper level manager
   2. Senior administrator
   3. Board member
   4. Owner

51. The staff member responsible for reporting to upper-level management and at the same time interacting significantly with several lower-level managers is the _____. (p. 7)
   1. Director of finance
   2. Director of nursing
   3. Charge nurse
   4. Assistant to the administrator
52. The staff person for whom both upward and downward communication skills are the most necessary is the _____. (p. 7)
   1. Staff development coordinator
   2. Director of nursing
   3. Nursing supervisor
   4. Assistant administrator for personnel

53. When the director of nursing makes an effective policy decision without consulting the administrator that impacts all nursing personnel, the administrator should _____. (p. 7)
   1. Be pleased
   2. Nevertheless be somewhat concerned
   3. Counsel with the director of nursing about chain of command
   4. Begin the search for a new director of nursing

54. In the typical nursing facility, the decision-making process is ____ establishment of lower, middle, and upper levels of management. (p. 8)
   1. Noticeably more complicated than the simple
   2. Normally accomplished by the
   3. Successful if the ownership ensures effective
   4. Rendered relatively uncomplicated through

1.1.2 LINE–STAFF RELATIONSHIPS

55. Among the following positions, the ____ has no authority to make decisions for the facility. (p. 8)
   1. Director of nursing
   2. Supply room manager
   3. Assistant to the administrator
   4. Evening charge nurse

56. Decisions made by persons on the staff to whom the administrator has delegated line authority are, in the final analysis, regarded as decisions by _____. (p. 8)
   1. The owners
   2. The board of directors
   3. The administrator
   4. The department head holding such line authority

57. When a nurse practitioner, who is more highly qualified than the director of nursing, gives orders to nurses in the hallways, the director of nurses should feel _____. (p. 9)
   1. Reaffirmed
   2. Undermined
   3. That quality of care is being reinforced
   4. That a useful support system is functioning
58. In times of crisis, corporate representatives, who hold a staff or advisory rela-
tionship with their counterparts in the local facility, may expect that their advice 
as staff be _____. (p. 9)
   1. Regarded as strong recommendations
   2. Approached on a “take or leave it” basis
   3. Respected
   4. Acted on as carrying line authority

1.2  FORECASTING

59. As a generalization, it can be asserted that managerial success belongs to those 
who _____. (p. 11)
   1. Successfully prepare for the future
   2. Are reactive on every front
   3. Constantly take initiatives
   4. Conserve resources

60. Nursing home administrators should anticipate and successfully prepare for 
_____ . (p. 11)
   1. Increased reimbursement
   2. New long-term care legislation
   3. Increased longevity
   4. Rapid change

61. The long-term care industry has entered a period in which _____ change(s) can 
be expected. (p. 11)
   1. Fewer
   2. More dramatic
   3. Rapid and far reaching
   4. A more controlled rate of

62. The ability to accurately predict the future implications for nursing facilities of 
new trends to which the present environment may offer small clues is the skill 
needed to successfully _____. (p. 11)
   1. Forecast
   2. Review
   3. Read the meaning of history
   4. Learn from the past

63. Historically, during the 1970s and early 1980s (until the introduction of the diag-
nosis-related group method [DRG] of reimbursement), nursing facility admin-
istrators made long-range projections during a period of _____. (p. 11)
   1. Unlimited change
   2. Intense social scrutiny of reimbursement mechanisms
   3. Relative stability in the health care field
   4. Rapid social change
64. The rate of change in the health care field is believed to be ____. (p. 12)
   1. Slowing down
   2. Coming under control
   3. Increasing exponentially
   4. Retrenching

65. Researchers have predicted that every 10 years ____ of all current knowledge and accepted practices in the health care and other industries will be _____. (p. 12)
   1. One fourth/obsolete
   2. One half/obsolete
   3. Three fourths/still usable
   4. Four fifths/still usable

66. It is conceivable that the core business of the nursing home in this decade will ____ the core business of the nursing home of the next decade. (p. 12)
   1. Be entirely different from
   2. Remain relatively stable and closely resemble
   3. Undergo change at a slower pace than
   4. Be remarkably similar to

67. One should expect that over the next few decades the rules governing the nursing home will be ____. (p. 12)
   1. Relatively stable
   2. New, never experienced before
   3. Even more formalized by Congressional legislation
   4. Enforced less due to decreased personnel available to state and federal agencies

68. Nursing homes that stick to conventional formulas for success are/will _____. (p. 12)
   1. Be more likely to survive
   2. Miss new markets and be in a backwash
   3. Be more likely to produce a steady profit
   4. Survive while those introducing constant change will lose needed focus

69. In the text it is argued that, for the first time in human history, the capacity exists to provide ____. (p. 12)
   1. Complete health care for all citizens
   2. A high level of health care for all citizens
   3. More health care than any nation can afford
   4. Affordable health care for all

70. The roles possible for hospitals, nursing homes, home health agencies, and managed care organizations are ____. (p. 12)
   1. Predictable and, likely, manageable
   2. Sorting themselves out
   3. Being more and more successfully managed by government
   4. Endless and will remain up for grabs
1.3 Planning

71. The staff in nursing facilities, over the next two decades, will likely _____. (p. 12)
1. Experience culture shock
2. Be reduced in staff/patient ratios
3. Become accustomed to a predictable core business
4. Remain committed to the facility, lowering turnover

1.3 PLANNING

1.3.1 WHY PLAN?

72. Plans can be said to be statements of the _____. (p. 13)
1. Hopes of the administrator
2. Hopes of the ownership
3. Prediction of the next steps needed
4. Organizational goals of the facility

73. In order to survive, each facility must _____. (p. 13)
1. Deal with the outside world
2. Have immeasurably more income than expenses
3. Know what the future will bring years in advance
4. Write enough policies to cover all contingencies

74. A major advantage associated with carefully developed plans is making it possible to _____. (p. 13)
1. Control the future
2. Not repeat past mistakes
3. Compare what happens to what was predicted
4. Compare what happens to past experiences

75. When external conditions change, plans _____. (p. 13)
1. Should remain in place
2. Can be altered to meet the changed conditions
3. Should be monitored, but not radically altered
4. Are of decreased value

76. Each facility’s strategic plan must be endorsed by _____. (p. 14)
1. The governing body
2. The local health authority
3. The state health department
4. The federal or state surveyors
77. The average number of prescriptions for persons in the United States aged 65 years and older is six. In nursing facilities, it is _______. (p. 14)
   1. Lower
   2. About the same
   3. Often double that number
   4. Fewer due to closer medical monitoring

78. The observation about the idea that “if it ain’t broke, don’t fix it” is ____. (p. 14)
   1. That this is functionally valuable conventional wisdom
   2. That if it ain’t broke today, it will be tomorrow
   3. That too few managers understand this good advice
   4. That this is a solid insight one can depend upon

79. The approach to planning known as SWOT refers to focusing on _____. (p. 48)
   1. Strengths, weaknesses, occupancy level, and threats
   2. Strategies, weaknesses, opportunities, and threats
   3. Strengths, weaknesses, opportunities, and threats
   4. Statistics, work options, opportunities, and trends

1.3.2 STEPS IN PLANNING

80. When considering building a new facility, necessary approvals by government agencies, such as zoning requirements, building codes, certificate of need, is/are _____. (p. 15)
   1. Routinely issued to applicants
   2. Sometimes difficult or impossible to obtain
   3. Available to all applicants
   4. Reserved for certain applicants

81. In general, government purposes and the facility goal of providing high-quality care are _______. (p. 15)
   1. Diverging in recent years
   2. The same
   3. Different
   4. Difficult to assess meaningfully

82. Looking at competitors’ expansion plans, occupancy levels, and local hospital plans when considering building a nursing facility is known as conducting a _____. (p. 16)
   1. Needs assessment
   2. Review
   3. Constructive analysis
   4. Construction review
83. When planning a new nursing facility, the goal of being in operation within 4 months is best described as a/an _____. (p. 17)
   1. Unrealistic goal
   2. Long-range objective
   3. Short-range objective
   4. Realistic goal

84. As a general rule, the planning process moves from _____. (p. 17)
   1. Goal to goal
   2. Unrealistic to realistic
   3. General to specific
   4. Vague to sharp

85. One view of the planning process includes the observation that _____. (p. 17)
   1. The future will change our plans
   2. Keeping to a carefully thought-out plan is essential
   3. Planning produces a reasonable degree of certainty
   4. Plans, once in place, keep us on track toward our goal

86. Nursing home administrators who expect the unexpected and thrive on it _____. (p. 17)
   1. Exhibit an unnecessary anxiety about the future
   2. Are too pessimistic
   3. Will last in the profession
   4. Will not make enough plans

87. Facilities that embrace each new technology as it becomes available are known as _______. (p. 18)
   1. Correct
   2. Improvement oriented
   3. Early adapters
   4. The winners

88. The area offering the richest opportunities for innovation is _____. (p. 17)
   1. Nursing
   2. Financing
   3. The unexpected
   4. New trends

89. When one accepts the idea that change is a permanent part of life _____. (p. 18)
   1. Life becomes more uncontrollable
   2. Life becomes less comfortable
   3. Uncertainty proliferates
   4. One can take advantage of new opportunities
90. One must assume that other nursing home administrators in the community _____ . (p. 17)
   1. Have found the best ways to “climb the mountain”
   2. Are excellent marketers
   3. May fail, if you fail
   4. Are “searching for new ways to climb the mountain”

1.4 ORGANIZING

91. In the process of organizing the work of a facility, it is of real importance to ensure that _____ . (p. 19)
   1. Workers are satisfied
   2. Any union preferences are met
   3. There is no duplication of work
   4. Sufficient managers are appointed

92. Organizing is the first step in implementation of a/an _____. (p. 19)
   1. Challenge to the workers
   2. Plan
   3. Organizational chart
   4. Organizational reorganization

93. What the worker does, how the worker does it, what aids are necessary, what is accomplished, and what skills are needed are parts of a _____. (p. 19)
   1. Job family
   2. Job review
   3. Needs assessment
   4. Job analysis

94. It can be argued that all nursing facility administrators organize their facility according to _____. (p. 19)
   1. Local requirements
   2. The owners’ needs
   3. Some theory of organization
   4. The same theory of organization

95. Viewing organizations as systems has the advantage of offering the manager a framework for visualizing the ____ of the organization. (p. 19)
   1. Inputs
   2. Outputs
   3. Internal and external environment
   4. Restraints
1.4 Organizing

96. An organized or complex whole, an assembling or combining of things or parts forming a complex or single whole, best describes the _____. (p. 19)
   1. Systems concept
   2. Organizational theory concept
   3. Complexity concept
   4. Organizational chart concept

97. A primary advantage of systems theory is that it serves as a tool for making sense of the world by making clearer _____. (p. 20)
   1. How people interact
   2. Interrelationships within and outside the organization
   3. Interrelationships among the staff
   4. Interactions between staff and residents and their responsible parties

98. If the outputs of the organization do not meet the administrator’s expectation he takes ____ actions to bring the outputs into line with those planned. (p. 21)
   1. Results-oriented
   2. Quick
   3. Effective
   4. Control

99. In essence, what nursing facilities do is use money to hire staff and provide materials needed to _____. (p. 21)
   1. Give patient care
   2. Show profitability
   3. Achieve conformity to regulations
   4. Meet owner requirements

100. The patient care that is given by the facility (i.e., the output) _____. (p. 22)
    1. Is usually good
    2. Can range from good to unacceptable
    3. Achieved cures for the residents
    4. Meets federal and state requirements

101. Asking if the work accomplished by the facility is up to expected standards and, if not, taking corrective actions is the act of _____. (p. 23)
    1. Taking charge
    2. Reviewing results
    3. Controlling quality
    4. Control of the inputs

102. The administrator uses ____ as the guidelines to compare the output with the expected results. (p. 23)
    1. The facility’s policies and plans of action
    2. Goals
    3. Stated objectives
    4. External judgments
103. Allocating resources is the process of dividing resources among the various _______ of those resources. (p. 21)
   1. Claimants
   2. Current uses
   3. Traditional uses
   4. Competing possible uses

104. Optimizing resources is allocating resources with the result that ______ use is achieved. (p. 21)
   1. The fullest
   2. Most wanted
   3. Most effective possible
   4. Ever improving

105. Suppliers, bank creditors, visiting regulators, and advocacy groups can be thought of as ________ who evaluate the facility. (p. 22)
   1. Beneficiaries
   2. Potential regulators
   3. Clients
   4. Stakeholders

106. The most direct and immediate stakeholders within the facility are the _______. (p. 22)
   1. Family and personal representatives
   2. Immediate relatives
   3. Care recipients
   4. New hires

107. The passage of the Nursing Home Reform Act can be viewed as a form of _____ the nursing home industry. (pp. 23–24)
   1. Oppressive measure imposed on
   2. Object-oriented programming goals of
   3. External feedback of
   4. Internal feedback of

108. The external environment of the nursing facility consists of ______. (p. 25)
   1. Opportunities
   2. Initiatives available
   3. Constraints
   4. Opportunities and constraints

109. If something relates meaningfully to a nursing facility, but is something over which the facility has no control, for example, enforcement of the federal certification requirements, it can be said to be ______. (p. 25)
   1. Outside the facility’s environment
   2. A constriction to the facility being successful
   3. A constraint in the external environment
   4. An opportunity
110. Increasing availability of managed care contracts, new niches, and increasing numbers of elderly needing care can be considered to be _____. (p. 25)
   1. Constraints
   2. Changes
   3. Opportunities
   4. Additional requirements

111. Systems analysis is most/equally useful to _____. (p. 26)
   1. The administrator
   2. The director of nursing
   3. The head of housekeeping
   4. The administrator, director of nursing, and head of housekeeping

112. Typically, the output of the nursing home as a system becomes the input for _____. (p. 26)
   1. Psychiatric hospitals
   2. Managed care organizations
   3. Health maintenance organizations
   4. The hospital or the resident’s home

113. A nursing home and similar organizations can grow _____. (p. 27)
   1. Within a limited time span
   2. Until negative entropy applies
   3. Until resources run low
   4. Without any time limit

114. The entropy process is considered a universal law of nature that all organisms _____. (p. 27)
   1. Can grow indefinitely
   2. Move toward death
   3. Can expand
   4. Can expand as long as more inputs are available

115. As a general characteristic of organizations, it has been argued that, in general, organizations seek to _____. (p. 28)
   1. Grow
   2. Maintain their current size
   3. Shrink as needed
   4. Be flexible in adapting to change

116. Once in place, organizations become creatures of habit and develop a tendency to _____ change. (p. 28)
   1. Embrace
   2. Resist
   3. Build on
   4. Create
117. The most predictable response of a nursing facility experiencing a “disruptive employee” is to _____. (p. 28)
   1. Hold an inservice
   2. Counsel with the employee
   3. Let the employee go
   4. Contact the Equal Employment Opportunities Commission (EEOC) and ask for action

118. When a nursing facility chain goes from being the leader to being behind the pack, this can likely be attributed to _____. (p. 29)
   1. Bullheadedness of top management
   2. Overconfidence
   3. Lack of enthusiasm
   4. A deep reservoir of outmoded attitudes and policies

119. The training received in nursing school, medical school, and physical therapy school tends to _____. (p. 29)
   1. Create resistance to change
   2. Encourage innovation
   3. Open graduates to change
   4. Focus on niches

120. The real purpose of systems thinking is to _____. (p. 29)
   1. Empower people to introduce organizational change
   2. Ensure that the current adjustments remain
   3. Tutor employees in how the organization is arranged
   4. Achieve conformity to the organizational chart

1.5 STAFFING

121. The movement of American medicine from 80% general practitioners in 1870 to 20% general practitioners in the 2000s is an illustration of the tendency of organizations to _____. (p. 29)
   1. Grow increasingly complex
   2. Embrace change
   3. Reverse their ratios
   4. Achieve independence

1.6 DIRECTING

122. Directing is the process of communicating to employees what is to be done by each of them and _____. (p. 31)
   1. Enforcing the rules
   2. Rewriting the rules
   3. Helping them to accomplish it
   4. Providing active training courses
1.6.1 POLICY MAKING

123. It is _____ to make policies that direct the activities of employees everywhere in the facility 24 hours a day. (p. 32)
   1. Impossible
   2. Improbable
   3. Possible
   4. Undesirable

124. It is neither possible nor desirable to establish policies for _____. (p. 33)
   1. All nursing assistants
   2. The admissions coordinator
   3. Every conceivable situation
   4. Situations with some variability

125. The specific spelling out, step by step, of the intended implementation of a policy is known as a ____. (p. 33)
   1. Set of controls
   2. Detailing of policy
   3. Set of procedures
   4. Set of limits

126. A detailed plan of actions expected of each employee upon hearing the fire alarm is known as ____. (p. 33)
   1. A clearly developed policy
   2. A set of procedures
   3. Management expectations
   4. Detailed instructions

127. Normally, the ________ for the facility sets the mission and goals. (p. 32)
   1. Family council
   2. Executive committee
   3. Governing body
   4. Ombudsmen

128. Normally, the facility’s role in implementing a facility’s mission is to __________. (p. 32)
   1. Originate ideas
   2. Write and implement more specific policies and procedures
   3. Edit as needed and implement
   4. Combine owners’ and residents’ ideas
1.6.2 MAKING A DECISION

129. The internal process by which managers make decisions is _____. (p. 38)
   1. Well understood
   2. A subject of little interest
   3. Entirely subjective
   4. Imprecise, not well understood

130. It is the administrator’s job to ensure that all employees make the right decisions for the facility _____. (p. 38)
   1. In every case
   2. With a minimum of worry
   3. Quickly
   4. As often as possible

131. Ethical practices throughout the facility are the ________responsibility. (p. 39)
   1. Owner’s
   2. Stakeholder’s
   3. Administrator’s
   4. Director of nursing’s

1.6.3 LEADING

132. Organizations that thrive over an extended period of time depend on having ______. (p. 39)
   1. Large profit margins
   2. Charismatic leadership
   3. Consistent leadership
   4. Effective leaders

133. Compared to defining the concept deciding, defining the concept leading is _____. (p. 39)
   1. Less difficult
   2. More difficult
   3. Much less difficult
   4. Researched and understood

134. The concept that history is made or measurably influenced by individuals who become leaders is known as _____. (p. 39)
   1. Leadership by men
   2. Leadership by innovators
   3. The great leadership theory of history
   4. Man the maker theory
135. Democratic, authoritarian, and laissez-faire are _____. (p. 40)
1. Types of leadership styles
2. Outmoded models for today’s leaders
3. Discounted today
4. Types of political positions

136. A supervising staff member whom the administrator might most want to provide leadership by walking around is the _____. (p. 41)
1. Receptionist
2. Charge nurse
3. Director of nursing
4. Director of housekeeping

137. A major information advantage to leadership by walking around is the opportunity to ____. (p. 41)
1. Check on staff
2. Do naive listening
3. Get out of the office
4. Check the floors

138. It is ____ to maintain the chain of command when an administrator practices leadership by walking around. (p. 41)
1. Especially difficult
2. Especially easy
3. Entirely feasible
4. Impossible

139. An effective administrator does not overrule middle-level managers unless _____. (p. 41)
1. He or she personally disagrees
2. Harm could result
3. Management has specifically addressed that situation
4. Rules are not being fully observed

140. The administrator’s work begins once the board has set forth the ____ of the organization. (p. 40, 60)
1. Full rules
2. Day-to-day rules and regulations
3. Mission statement
4. Procedures to be followed

141. The best time for the administrator to introduce change in the facility is when _____. (p. 42)
1. Everyone is ready for it
2. It is clear to all that the situation demands it
3. It will improve the bottom line
4. He or she does not have to
142. The better administrator is the one who _____. (p. 42)
   1. Spends most hours in the facility wings
   2. Is in his or her office constantly exploring ways to lead
   3. Reviews reports as the primary information channel about the facility
   4. Prepares for certification and the state to come in

143. For every successful decision the administrator makes _____. (p. 42)
   1. The administrator is praised
   2. Recognition comes from those affected
   3. He or she may experience two or three wipeouts
   4. Ownership is grateful

144. One thing the successful administrator remembers about the environment is that it _____. (p. 42)
   1. Remains beyond control
   2. Can be harnessed
   3. Can be brought under control
   4. Can be static

145. One reason for the administrator not to give all attention to the most immediate opportunity is that _____. (p. 42)
   1. Corporate is unlikely to approve
   2. Change costs too much energy
   3. Better opportunities may also exist
   4. It may not be what it seems

146. The best time to begin a move toward introducing a change into a facility is when _____. (p. 42)
   1. Change is still on the horizon
   2. Change is imminent
   3. The climate is right
   4. The staff are receptive

147. In the views of some contemporary corporate managers, change should be viewed more as a/an _____. (p. 42)
   1. Continuous process, not an event
   2. Process with some consistency
   3. Predictable process that can be managed
   4. Opportunity to consolidate past gains

148. Being knowledgeable about the field and having competence and experience will take today’s administrator to _____. (p. 43)
   1. Excellence
   2. A good level
   3. The highest level
   4. Charismatic leadership
149. When nursing facility administrators have “that particular thing” in their blood they have a fire in the heart for _____. (p. 43)
   1. Continuous quality improvement
   2. Continuously improving the quality of daily life of each resident
   3. A successful career
   4. Being totally professional

150. Manager-centered leadership retains a _____ degree of control and uses _____ extensively. (p. 44)
   1. Low/authority
   2. Medium/authority
   3. High/authority
   4. High/charisma

151. Permitting subordinates to make the decision and function within the limits defined by the manager is closest to a _____ style of management. (p. 44)
   1. Laissez-faire
   2. Democratic
   3. Authoritarian
   4. Charismatic

152. When deciding what style of management to employ in a given situation, administrators should consider factors within themselves, factors in the employees, and factors in the ____. (p. 45)
   1. Organization
   2. External environment
   3. Five-year plan
   4. One-year plan

153. A manager who is responsible for the development of more specific policies that interpret administration’s policies for the employees one supervises is closest to ____ managing. (p. 45)
   1. Upper-level
   2. Middle-level
   3. Lower-level
   4. Integrated

154. The charge nurse responsible for applying policies provided by the director of nursing services is functioning most closely at the _____ level of management. (p. 45)
   1. Upper
   2. Middle
   3. Lower
   4. Integrated
155. Origination, change, creation, and elimination of structure are the responsibility of _____ management. (p. 46)
   1. Upper-level
   2. Middle-level
   3. Lower-level
   4. Functional

156. Operational use of existing structure is the responsibility of _____ management. (p. 46)
   1. Upper-level
   2. Middle-level
   3. Lower-level
   4. Functional

157. Successful leaders need to be keenly aware of relevant forces in the situation, to understand themselves, and also _____ vis-à-vis the situation. (p. 47)
   1. Be calm and purposeful
   2. Interpret successfully
   3. Have insight
   4. Be able to behave appropriately

158. The acts of the _____ leader are typically unexamined. (p. 49)
   1. Accepted
   2. Venerated
   3. Charismatic
   4. Fully established

159. A valuable goal for each administrator is to deliver short-term results while securing _______. (p. 48)
   1. New friends
   2. High-level support
   3. Long-term viability
   4. Medium-term goals

1.6.4 POWER AND AUTHORITY

160. When one is able to motivate someone to do something he or she would not otherwise do, one is said to be wielding _____. (p. 51)
   1. Undue influence
   2. Self-control
   3. Power
   4. Excessive influence
161. In the American culture power is a/an _____. (p. 51)
   1. Relatively well-understood concept
   2. Accepted tradition for all members of society
   3. Complex concept
   4. Simple set of beliefs

162. The administrator’s ability to award or withhold a year-end bonus represents _____ power held by the administrator. (p. 52)
   1. Punishment
   2. Overarching
   3. Financial
   4. Reward

163. Fear that the administrator may write a negative report and place it in one’s personnel file represents the administrator’s _____ power. (p. 52)
   1. Expert
   2. Personnel
   3. Controlling
   4. Punishment

164. Employees identifying and admiring the administrator yield _____ power to the administrator. (p. 52)
   1. Expert
   2. Exceptional
   3. Additional
   4. Referent

165. Two types of power available to all staff members are _____. (p. 52)
   1. Legitimate and reward
   2. Punishment and reward
   3. Referent and reward
   4. Expert and referent

166. As a general rule, it is better if an administrator can possess and exercise _____ power. (p. 52)
   1. Expert and referent
   2. Charismatic and punishment
   3. Expert and punishment
   4. Legitimate and punishment

167. The presence of numerous professions such as the medical, nursing, dental, and pharmaceutical professions in the facility tend to _____ the administrator’s power. (p. 53)
   1. Constrain
   2. Increase
   3. Augment
   4. Supplement

1. MANAGEMENT, GOVERNANCE, AND LEADERSHIP

1.6.5 COMMUNICATION SKILLS

168. Communication is the exchange of information and the transmission of _____. (p. 54)
   1. Meaning
   2. Memos of documentation
   3. Faxes
   4. Internet messages

169. The administrator initiates a communication and it is transmitted from its source to its destination. Communication has _____. (p. 55)
   1. Not yet taken place
   2. Been accomplished
   3. Been reviewed
   4. Been retrieved

170. Listening with intensity, acceptance, empathy, and a willingness to assume responsibility for understanding the speaker’s complete message is sometimes called _____. (p. 55)
   1. Passive listening
   2. Attentive listening
   3. Active listening
   4. Paying full attention

171. Two systems of communication usually exist side by side in an organization and are known as _____. (p. 55)
   1. Active and inactive
   2. Upward and lateral
   3. First layer and second layer
   4. Formal and informal

172. Two nurses chatting while on break in the nurse’s lounge about a patient’s status is ____ communication. (p. 55)
   1. Upward
   2. Downward
   3. Horizontal
   4. Peer

173. Two nurses chatting about the most recent events in the administrator’s office while on break in the nurses’ lounge are engaged in ____ communication. (p. 55)
   1. Formal
   2. Informal
   3. Casual
   4. Gossip-type
174. It can be reasonably argued that every communication is likely to have _____. (p. 55)
   1. Intended impact
   2. Unintended consequences
   3. Serendipitous results
   4. Multiple levels of meaning

175. The informal communication process most closely resembles _____. (p. 55)
   1. The consultant pharmacist reporting findings to the director of nursing
   2. The nurse assistant chatting with a resident while making the bed
   3. The administrator calling a report in to corporate
   4. The charge nurse reporting to the nurse supervisor

176. The director of nursing giving instructions to the nurse supervisor is considered _____. (p. 55)
   1. Upward communication
   2. Downward communication
   3. Flawed communication
   4. To be done twice each shift

177. The nurse assistant reporting to the nurse supervisor about an incident in a patient room is an example of ____ communication. (p. 55)
   1. Upward
   2. Downward
   3. Optional
   4. Well-organized

178. The closer one gets to the organization center of control, the administrator’s office, for example, the _____. (p. 55)
   1. More pronounced the emphasis is on the exchange of information
   2. Less important constant information exchange becomes
   3. Less necessary written reports become
   4. More comfortably the administrator can operate

179. The nurse assistant, preoccupied and angry over unsettled matters at home, interprets the comments by the nurse as hostile comments. This illustrates a barrier to communication known as _____. (p. 56)
   1. Differences in knowledge level
   2. Subgroup allegiance
   3. Status distance
   4. Agenda carrying
180. The charge nurse who remembers the words of praise from the director of nursing but ignores the criticisms also received from the director of nursing illustrates a barrier to communication known as ____. (p. 56)
1. Selective hearing
2. Subgroup allegiance
3. Status distance
4. Agenda carrying

181. A nurse assistant realizes that her fellow nurse assistant is sleeping much of the night shift, but decides not to report her. This illustrates ____. (p. 56)
1. Differences in knowledge level
2. Subgroup allegiance
3. Status distance
4. The filter effect

182. The nurse’s aide realized that the patient’s condition should be pointed out to the attending physician who had just popped into the patient’s room, but hesitated to approach the physician. This illustrates the effects of ____. (p. 57)
1. Differences in knowledge level
2. Subgroup allegiance
3. Status distance
4. The filter effect

183. The medication nurse thought she understood what the pharmacist had just said about the side effects of a medication, but found the technical jargon used by the pharmacist to be intimidating. This illustrates ____. (p. 57)
1. Differences in knowledge level
2. The language barrier
3. Status distance
4. The filter effect

184. The charge nurse decided not to write up an incident on her shift because four incidents had already been written up that week on her shift. This illustrates ____. (p. 57)
1. Differences in knowledge level
2. Subgroup allegiance
3. Self-protection
4. The filter effect

185. The new 30-page-long policy on universal precautions contained so many new requirements that staff soon began to revert to their time-tested approaches in conducting patient care. This illustrates ____. (p. 57)
1. Differences in knowledge level
2. Information overload
3. Status distance
4. The filter effect
1.6.6 ORGANIZATIONAL NORMS AND VALUES: CODE OF ETHICS AND STANDARDS OF PRACTICE

186. Under Tag F241 the government defines dignity as caring for residents in a manner that maintains full recognition of the resident’s _____. (p. 59)
   1. Individuality
   2. Personal tastes
   3. Past types of activities
   4. Reasonable expectations

187. Dignity has been interpreted by states’ examiners _____. (p. 60)
   1. With wide variations
   2. Fairly consistently
   3. Differently depending on the section of the country
   4. With excellent consistency

188. Standardized patterns of required behaviors developed by the facility to enable staff to accomplish necessary work defines a _____. (p. 59)
   1. Norm
   2. Set of values
   3. Specific patterns
   4. Role

189. Since about the year 2000, the percentage of nursing facilities in the United States given deficiencies in quality of life, dignity _____. (p. 59)
   1. Held steady
   2. Went consistently up
   3. Varied widely by state and over time
   4. Went lower as facilities improved care

190. Treating all residents with respect is best described as a _____. (p. 59)
   1. Role
   2. Norm
   3. Value
   4. Commitment

191. A statement broadly defining the purposes and values held by a facility is a _____. (p. 60)
   1. Statement of intent
   2. Set of aspirations
   3. Long-term goal
   4. Mission statement
192. When the administrator concentrates on getting paperwork done, meeting regulations, and saving money, the staff _____. (p. 60)
1. Are freed to give more attention to good patient care
2. Do the same
3. Feel the facility is being successfully managed
4. Give better quality care

193. The area in which it is especially important for the administrator to implement a “no excuses” approach is _____. (p. 60)
1. In preventive maintenance
2. In projecting capital needs
3. Patient care
4. Staff attitudes

194. It is easier for staff to buy into and be motivated by a _____. (p. 61)
1. Day-to-day set of achievements to be reached
2. Well-organized administrator
3. Well-motivated administrator
4. Dream or vision

195. If a facility administrator can communicate a vision or dream _____. (p. 61)
1. Goals are less necessary
2. Goals can be more easily set and achieved
3. Employee tenure will be maintained
4. Employees will stop focusing on pay rates

196. Each state legislature publishes standards of practice and sets the ______ behavior expectations for nursing home administrators. (p. 60)
1. Legalistic
2. Most forceful
3. Ethical
4. Fully agreed upon

197. Corporate-generated goals or mission statements generally _____. (p. 61)
1. Motivate local facility workers
2. Enervate
3. Innovate
4. Have difficulty motivating local facility workers

198. Organizations need the leadership of the administrator because, in the final analysis, _____. (p. 61)
1. The administrator knows what is best
2. People need to be led
3. Someone has to be in charge
4. All organizational designs are imperfect
199. The actual behavior and functioning of an organization such as a nursing facility ______. (p. 61)
1. Closely resemble the plan
2. Are an implementation of the plan
3. Are relatively easily achieved
4. Are infinitely more complex and incomplete than the plan

1.6.7 RELATED CONCEPTS

200. The concept of delegation is permitting decisions to be made ______. (p. 63)
1. With full information
2. By the well-qualified nurse
3. At the lowest level possible
4. At the middle level of management

201. How people relate to each other in the organization and the overall style or feel of an organization are referred to as ______. (p. 62)
1. Corporate meaning
2. The value system
3. The corporate culture
4. The personnel handbook mission statement

202. The concept of unity of command emphasizes the importance of each person ______. (p. 63)
1. Feeling like he or she fits in
2. Remaining on the team
3. Having a meaningful role in the organization
4. Being accountable to one supervisor

203. When the board of directors gives equal authority to manage the facility to the medical director and the administrator, the board has ignored the ______ concept. (p. 63)
1. Short chain of command
2. Utility
3. Delegation
4. Unity of command

204. The principle that there should be as few levels of management between the chief administrator and the rank and file is the ______. (p. 63)
1. Short chain of command
2. Intervening levels
3. Effective middle levels of managers
4. Maximum use of managers
205. When the number of interpreters through whom information must be filtered before it reaches top management is minimized, the concept of _____ has been implemented. (p. 63)
   1. Balance
   2. Span of control
   3. Short chain of command
   4. Low profile

206. The administrator who pays attention to the size of the various departments, centralization and decentralization, span of control, and short chain of command is paying attention to ____. (p. 64)
   1. Being a good manager
   2. Being effective
   3. The concept of balance
   4. What is occurring in the facility

207. The administrator who begins with the nursing assistants’ ideas then moves upward through the director of nursing’s ideas and does so for each department is utilizing the concept of _____. (p. 64)
   1. Management information systems
   2. Lowest to highest
   3. Respect for the individual worker
   4. Management by objectives

208. In determining the need for information; sources of information; and the amount, form, and frequency of information, the administrator is considering his or her _____. (p. 64)
   1. Idea sources
   2. Ways of organizing the facility
   3. Management information system
   4. Record-keeping measures

209. The administrator tells the admissions director to drop the daily reporting and to report only on days census drops below 90%. The administrator is utilizing the _____ concept. (p. 65)
   1. Program Evaluation and Review Technique (PERT)/Critical Path Method (CPM)
   2. Delegation
   3. Management by objectives
   4. Management by exception

210. Mapping out time estimates for the completion of each step in renovating a wing is using _____. (p. 65)
   1. Program Evaluation and Review Technique (PERT)/Critical Path Method (CPM)
   2. Delegation
   3. Management by objectives
   4. Management by exception
211. The administrator in the chain who is achieving the best level of resident care, but not necessarily the lowest cost per patient day, can be said to be ____, although perhaps not the most efficient administrator. (p. 65)
   1. Most acceptable
   2. Effective
   3. Best motivated
   4. The best producer

212. Studies of top corporate administrators suggest that these persons feel that they can ____. (p. 66)
   1. Manage best in their industry
   2. Train anyone to become a top manager
   3. Be motivators for everyone in the organization
   4. Manage almost anything

213. The administrator who focuses on the time it takes for each housekeeper to clean an area and the time it takes for a nurse assistant to make a bed identifies with the _____. (p. 66)
   1. Necessity to conserve time
   2. Necessity to be effective
   3. Scientific management school
   4. Human relations school

214. Administrators who believe that human factors exercise the most powerful influences due to worker need to participate in social groups identify with the _____ school of management theory. (p. 67)
   1. Scientific
   2. Practical
   3. Theoretical
   4. Human relations

215. Security of residents’ medical records is of special concern because it is covered under _________. (p. 68)
   1. Most state rules
   2. All state rules
   3. Health department rules
   4. HIPAA

216. Encoding data into unrecognizable streams of data while data are in transit is known as _________. (p. 68)
   1. A prudent business practice
   2. Good data management
   3. Information technology
   4. Cryptology
217. Web-based technologies to create interactive platforms through which individuals and communities share, create, and discuss ideas is known as _______. (p. 69)
1. Information technology
2. Social media
3. Emerging tools
4. Best practices

1.7 COMPARING AND CONTROLLING QUALITY

218. An administrator judging the extent of actual results of the facility’s efforts to achieve the outcomes proposed in its plans is _____. (p. 70)
1. Reviewing
2. Judging
3. Achievement oriented
4. Comparing

219. The administrator who is successfully taking the steps necessary to adjust policies and plans of action to more satisfactorily achieve stated goals is engaged in _____. (p. 70)
1. Active managing
2. Controlling
3. Implementing
4. Conserving resources

220. Translating goals into clearly stated policies, identifying appropriate measures, and stating limits to deviation are some of the requirements for _____. (pp. 70–71)
1. Improving management
2. Effective control of quality
3. Getting ahead of competitors
4. Managing for results

221. Getting information in a useful form to staff at appropriate levels, stating policies of actions to be taken when limits are exceeded, and taking corrective actions are some of the requirements for _____. (p. 71)
1. Improving management
2. Effective control of quality
3. Getting ahead of competitors
4. Managing for results
222. Setting up a system for constant renewal of quality measures, finding control measures that are functional and valued by staff, and knowing the limitations of the scope and capabilities of a system are some of the requirements for _____. (p. 71)
   1. Improving management
   2. Effective control of quality
   3. Getting ahead of competitors
   4. Managing for results

1.7.2 DIAGNOSING/ORGANIZATIONAL QUALITY

223. Physicians diagnose and treat patient illnesses; administrators diagnose and treat ____ illnesses. (p. 72)
   1. Staff
   2. Corporate
   3. Organizational
   4. Epidemic

224. When an administrator studies and determines what is believed to be a problem adversely affecting the nursing facility, the administrator is engaged in a study of _____. (p. 72)
   1. Human nature
   2. What motivates employees
   3. Organizational pathology
   4. Organizational attitudes

225. Which of the following is not a federal quality measure? _____. (p. 72)
   1. Percent of staff having a good feeling about patients
   2. Percent of residents who need help with activities of daily living
   3. Percent of residents with urinary tract infections
   4. Percent of short-stay residents with pressure sores

226. Managers have always sought to achieve quality control in their organizations and _____. (p. 72)
   1. Clear successes have been attained across the board
   2. The need for such control is a subject of controversy
   3. This remains an elusive aspect of managing
   4. This is largely a thing of the past since the turn of the century

227. Ensuring that all the organizational arrangements believed to be needed are in place puts the emphasis on ____ as a quality measure. (p. 78)
   1. Structure
   2. Process
   3. Outcome
   4. Productivity
228. Focusing on the results of the effort made and the measurable impact on the patient given care places the emphasis on _____ as a quality measure. (p. 79)
   1. Structure
   2. Process
   3. Outcome
   4. Productivity

229. The federal focus on the idea that a resident’s abilities in activities of daily living do not diminish unless circumstances indicate it is unavoidable places the focus on _____. (p. 79)
   1. Structure
   2. Process
   3. Outcome measures
   4. Productivity

230. Quality, argued Deming, comes from _____. (p. 74)
   1. Constant inspections
   2. A low rework rate
   3. Improvement in the process
   4. Unswerving attention

231. Deming observed that too often nurses and nurse’s aides _____. (p. 74)
   1. Did not really care about doing a quality job
   2. Did not identify with the goals of the facility
   3. Learned their job from workers who were never trained properly
   4. Learned too much in nursing and nursing assistant training

232. The nurse supervisor’s job, according to Deming, is to _____. (p. 74)
   1. Lead
   2. Train properly
   3. Set standards
   4. Require commitment

233. An atmosphere, according to Deming, in which employees feel secure enough to ask questions, take positions, and admit errors is free of _____. (p. 74)
   1. Serious mistakes
   2. Arguments
   3. Fear
   4. Refusal to work

234. The best source of slogans or work goals, in Deming’s view, is _____. (p. 74)
   1. Corporate leadership
   2. The community
   3. The facility
   4. Each individual worker
235. Deming would _____ (of) setting the number of beds to be made each day or the number of rooms to be cleaned or floors scrubbed. (pp. 74–75)
   1. Approve
   2. Disapprove
   3. Insist on
   4. See as quite functional the

236. In Deming’s view, workers are _____. (p. 75)
   1. Eager to do a good job
   2. In need of constant retraining
   3. Uninterested in the overall goals of the business
   4. Unmotivated for the most part

237. Evaluation by performance, merit rating, and annual review of performance, in Deming’s view, _____ (p. 75)
   1. Encourages workers
   2. Allows workers to know where they stand
   3. Is regarded by workers as fair and needed
   4. Destroys teamwork and nurture rivalry

238. If the administrator tells the director of nursing to compare how the facility’s nursing services are organized with what is considered the best organized nursing services in the area, the administrator is _____. (p. 76)
   1. Comparing
   2. Contrasting
   3. Benchmarking
   4. Trying to improve

239. A benchmarking effort _____ be justified by seeking out significantly better practices rather than solely focusing on best practices. (p. 76)
   1. Can rarely
   2. Can
   3. Never is
   4. Always can

240. When Deming warned not to simply copy others’ efforts when benchmarking, he was advocating _____. (p. 77)
   1. A new approach to benchmarking
   2. Less benchmarking
   3. Improved benchmarking
   4. Adapting, rather than copying, benchmarked ideas

241. Total organizational involvement in improving all aspects of quality of service is the goal of _____. (p. 77)
   1. Total quality management
   2. New management
   3. Spectrum management
   4. Management by objective
242. The approach in total quality of management of placing responsibility with the workers who produce a service is sometimes known as _____. (p. 77)
1. Source management
2. Outsourcing
3. Quality at the source
4. Worker involvement

243. Employee empowerment in decision making, use of teams, and use of individual responsibility for services characterizes _____. (p. 77)
1. Management by quality
2. Resource maximization
3. Total quality management
4. Benchmarking

244. In the American Hospital Association’s view, the goal of total quality management is to ____ customer expectations. (p. 78)
1. Meet
2. Anticipate
3. Exceed
4. Analyze

245. Visionary chief executive officers (CEOs) acting as coaches, commitment to customers, and trained teams characterize _____. (p. 77)
1. Successful benchmarking
2. The Deming analysis and recommendation
3. Total quality management
4. Management by objectives

246. Managing for quality consists of quality planning, quality control, and _____. (pp. 80–81)
1. Knowing the difference
2. Being able to see the difference
3. Quality improvement
4. Benchmarking

1.8 INNOVATING

247. Bringing new ideas into the way an organization accomplishes its purposes is the result of _____. (p. 85)
1. Hard work
2. Predicting the future
3. Innovating
4. Quality improvement
248. The role of innovator is _____. (p. 85)
   1. Best assigned to the administrator
   2. Available to all employees
   3. A skill employees are able to develop
   4. Best taught in inservices

249. One writer suggests that managers should ____ specific objectives that will guide the organization over an extended period of time. (p. 85)
   1. Avoid trying to set out too
   2. Encourage
   3. Assign
   4. Insist on

250. In the nursing facility, innovation is _____. (p. 86)
   1. Seldom encountered
   2. The prerogative of middle and upper management
   3. Finding new solutions to creating quality of life for residents
   4. An ever-elusive goal

251. Innovation can be expected _____. (p. 86)
   1. From all levels in a nursing home chain
   2. Primarily from upper-level management
   3. Primarily from ownership
   4. From middle-level well-trained staff who have the opportunity to update their skills

252. Google’s Android and Apple’s iOS have facilitated unprecedented development of _____. (p. 87)
   1. Communication
   2. Apps
   3. Software
   4. Future possibilities
