Hispanic Health Care International invites manuscripts of interest to health care providers, nurse clinicians, educators, and researchers. The purpose of the journal is to serve as a forum for the dissemination of information on practice, education, and research issues affecting the Hispanic/Latino population. Particularly welcome are manuscripts that are empirical, conceptual, reports of new instruments, and theoretical or methodological studies. Clinical articles include case studies that demonstrate application of evidence-based practice, short articles that provide insightful summaries of the most important research to draw clear conclusions with implications for practice, and brief reports. Manuscripts may be submitted in Spanish.

Manuscripts will be acknowledged on receipt. Following preliminary review by the editors, they will be sent to members of the editorial board. Hispanic Health Care International is a refereed journal. Articles will be reviewed by members of the editorial review board, comprised of experts with backgrounds in a variety of clinical and functional areas. Each manuscript will be reviewed by at least two experts on the topic. On publication, each author will receive a copy of the journal in which his/her article appears.
